

# Guardian Utility Vault

## PROTECT YOUR RIGHTS

When opening the Guardian Utility Vault there are two ways to access a stowed item. The vault can be locked and un-locked using a key or the key pad.

- ✓ When using a key, the vault can remain unlocked to allow for fast easy access, at the push of a mechanical button. When your vehicle is left unattended you can secure your weapon or cargo with the simple turn of a key.
- ✓ For keyless access, use the keypad. Simply enter a digital combination (up to six digits) and open the vault. To change the combination on the keypad first open the vault and push the reset button, then change the combination to any number from 1-6 digits. The vault can be opened using the keypad even when the key is in the locked position.

Color	Black Powder Coat
Material	304T-Stainless Steel; Mild Steel
Length	21.12 inches
Width	17.16 inches
Height	6 inches

---

The Guardian Utility Vault is designed to be securely mounted on the floor or trunk of any vehicle. It is also small enough to slide under a bed, in a dresser drawer or on a cabinet. The vault comes in black powder coat; however custom logos may be added for an additional charge. The Guardian Utility Vault is proudly made in the USA by Oregon Precision Manufacturing, located in Sherwood, Oregon.
